DAYANA LORZA

FORWARD DEPLOYED ENGINEER

Miami, FL | (510) 355-2623 | dayanalorza@gmail.com | dayanalorza.com | linkedin.com/in/dayanalorza

PROFESSIONAL SUMMARY

Forward deployed engineer with 15+ years of experience shipping software in production with customers — from discovery and prototyping through deployment and iteration — for startups and global brands including Apple, Cisco, and Palo Alto Networks. Built Haven, an AI employee for real estate teams that answers leads and books showings, deployed to live teams; run a software consultancy taking 0-to-1 products from architecture through production for clients across finance, crypto, luxury, and healthcare. Deep expertise in Node.js, TypeScript, Cloudflare Workers, and production AI agent systems — agentic workflows, LLM integration, and conversational AI — bridging engineering and customer outcomes.

CORE EXPERTISE

AI Development:
custom AI agents, AI agent orchestration, agentic workflows, LLM integration, MCP, Composio, conversational AI, Twilio, workflow automation, Claude, Codex, Cursor, GitHub Copilot, ChatGPT, Grok Bot, Hermes, OpenClaw, Open Code

Full Stack:
Node.js, Express, NestJS, Python, FastAPI, PHP, GraphQL, REST APIs, WebSockets, state management, MongoDB, PostgreSQL, SQL, Firebase, Supabase, Jest

Delivery:
Cloudflare Workers, AWS, Vercel, Netlify, CI/CD, GitHub Actions, cloud architecture, API integration, performance optimization, testing, TDD, Git, GitHub, pull requests, Alpaca, cross-browser development

Frontend:
React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, MUI (Material UI), responsive UI, PWAs, Svelte / SvelteKit, Backbone.js, Storybook, Zustand, TanStack Query, Redux, MobX, Cypress

Design Systems & UX:
Storybook, component libraries, design tokens, component variants, Figma, interactive prototyping, design-to-code, accessibility / WCAG, responsive layouts, UI documentation, data visualization

PROFESSIONAL EXPERIENCE

Principal Software Engineer & Founder — Kwantum Tech
Aug 2024 – Present

Miami, FL | Remote

- Build AI employees for realtors and wellness studios at a fraction of a hire’s cost; run AI audits that find and eliminate busy work.
- Ship agentic solutions — Hermes agents, Telegram bots, trading bots, workflow automation — for finance, crypto, luxury, and healthcare clients.
- Own and lead a software engineering consultancy delivering custom web and mobile products, AI agents, workflow automations, and private internal tools from discovery through production.
- Built CHAD v2, a trading engine for financial markets on Cloudflare Workers with an AI agentic coding workflow.

Senior Software Engineer — Fanfix
Jul 2022 – Aug 2024

Los Angeles, CA | Full-time | Remote

- Shipped live-streaming product experiences that became a core creator-facing feature.
- Led frontend architecture for the V2 web app serving ~3 million monthly users and 50,000 creators, built on React, GraphQL, and AWS.
- Cut website startup time by 72% through performance optimization.
- Built a reusable Storybook design system of 75+ components, cutting UI development time across the team.
- Mentored three engineers (full-stack and frontend) through onboarding and growth; ensured WCAG accessibility compliance across the design system and product UI.

Senior Software Engineer Jun 2019 – Jul 2022
Palo Alto Networks
Remote

- Built a new analytics dashboard for the Prisma Access team from scratch in 8 months on a tight deadline, serving a platform with millions of users during its fastest growth period.
- Developed React and TypeScript interfaces for Prisma Access security analytics and platform workflows.
- Managed complex application state with Redux across a multi-million-user analytics platform.
- Built reusable Storybook components with React Testing Library coverage for shared platform UI, improving consistency and reliability across complex data-driven experiences.

Senior UI Developer — Cisco May 2016 – May 2019
San Francisco Bay Area | Onsite

- Implemented and maintained test coverage for new and existing SMB portal features in a cross-functional product environment.
- Engineered user interfaces for Cisco's Small and Medium Business division using React, JavaScript, and Backbone.js.

Front End & Web Applications Developer — Apple Apr 2012 – Mar 2016
Apple.com & Apple University | Cupertino, CA | Onsite

- Designed and built a student enrollment application for Apple University using JavaScript, Backbone MVC, REST APIs, and JSON.
- Developed single-page applications that improved operational and support workflows for Apple University.
- Delivered pixel-accurate, responsive frontend experiences for Apple.com — one of the world's most-visited retail sites (~140M US visitors/month) — across devices, browsers, and platforms.
- Implemented product-launch features and reusable marketing experiences from design compositions; delivered email campaigns reaching tens of thousands of recipients per blast.

Interactive Developer — Sapient Apr 2008 – Apr 2012
Miami, FL

- Partnered with creative, project, and backend teams to deliver HTML, CSS, JavaScript, jQuery, and mobile web experiences across iPhone, iPad, and Android.
- Built microsites, landing pages, mobile experiences, and email campaigns for Citigroup, Mars, Dove, Chrysler, Burger King, and BBVA.

EDUCATION & RECOGNITION

Auburn University — B.A., Management Information Systems, 2005

OASIS Blockchain Gaming Hackathon — Winner, 2019

Grok Bot Build Competition (Wynwood, Miami) — Winner, Sep 2026 — Built after xAI engineer demo
